

Leading the way for INNOVATION

Does your project lack an effective
dissemination and communication strategy?

Are you looking for a successful **exploitation
strategy** for your projects?

Do you need **cutting edge knowledge** to
complement your consortium?

Who we are

FEUGA is a private, **non-profit Foundation** based in Galicia, Spain, with a **permanent office in Brussels**. With more than 40 years of experience in innovation management, FEUGA has established itself as a flagship organization in the field of **knowledge-transfer** acting as a catalyst to strengthen ties and foster technology and innovation transfer between universities, industry players and society in general.

Why FEUGA

The quality and success of our services are endorsed by two key factors: **the high level of commitment and expertise of our multidisciplinary staff and our positioning in Europe**. Our team comprises more than 20 professionals from complementary profiles including engineers, physicists, mathematicians, journalists, political scientists and financial and IP experts with extensive experience in knowledge and technology transfer at international level.

What we do

FEUGA is an expert organization in the areas of **communication, dissemination, Intellectual Property (IP) and exploitation of R&D results**, with a special focus on **Responsible Research and Innovation (RRI) and multi-stakeholder approach** methodologies.

FEUGA holds a Knowledge Transfer Office recognized by the **Spanish Ministry of Science and Innovation** developing its work at a regional, national and EU level, from boosting the Galician University System and participating in several initiatives related with innovation and entrepreneurship (such as the BFFood accelerator programme, Datalife, Gigal and InfabHub Digital Innovation Hubs) to **partnering in more than 45 EU funded projects**.

Multisectorial

Food & agriculture

Digital transformation

Oceans & Climate

Future & sustainable industry

Bioeconomy

Water, soils & circular economy

Health

Energy

Our projects

14 HORIZON EUROPE

16 HORIZON 2020

14 INTERREG

6 OTHER (Erasmus+, COSME, Digital Europe)

11 COLLABORATIONS

Our expertise

Intellectual Property and Market Uptake

Intellectual Property and exploitation management, developing the best technology transfer and commercialisation strategy of the project results.

Communication & Dissemination

Design and implementation of tailor-made communication and dissemination strategies for R&D projects and results adapted to the specific requirements of each project and different audiences.

Multi-stakeholder innovation ecosystems

Definition of knowledge transfer methodologies based on a multi-actor approach; Living-Labs; planning and coordinating activities for stakeholders' engagement and real involvement in research and innovation actions following the RRI principles (public engagement, citizen science, gender issues, etc.).

Policy watch

Promotion of the quadruple helix dialogue through the implementation of public-private collaboration models. Socio-economic analysis, policy support and RIS3 alignment.

Capacity building

Capacity building and skills development. Design of tailor-made training methodologies in EU Projects, fitting Erasmus+ and other EU programmes (Horizon Europe, Interreg,...) requirements.

Funding procurement

Analysis of funding opportunities for your ideas, definition of European networking strategy, help-desk on EU funding Programmes (Horizon Europe, Interreg, Erasmus+, ...), support to partners search.
